Retest of Johne’s blood test positives by faecal screening.

- Faecal samples must be collected per rectum by the herd’s veterinary surgeon.
- The veterinary surgeon must confirm that the ear number(s) of the animal(s) presented for sampling matches the ear number(s) of the animal(s) that tested positive by the blood test.
- The submission form should be completed and signed by the veterinary surgeon who collected the samples.
- The samples must be posted to the PCHS testing laboratory by the veterinary surgeon who collected the samples or by an employee of the veterinary practice.
- The above conditions must be met before the faecal samples will be tested as a second test for the purposes of CHeCS risk level accreditation.

No Samples Submitted: Blood Samples Faeces Samples

I have sampled the animals detailed in accordance with the first three bullet points.
